

12. EMERGENCY - URGENT MEDICINEⁱ	
Level II	
Department of Experimental and Clinical Medicine (DMSC)	
Course coordinators	Francesca Tarantini
Executive Committee	Francesca Tarantini Fabio Cianchi Stefano Romagnoli
Contact person for information regarding teaching organization, class schedule, course content	Francesca Tarantini francesca.tarantini@unifi.it
Practical-professional profile of the course and industry sector of reference	<p>Health care professionals working in territorial and intra-hospital Emergency - Urgent Care systems require specific training that only in part can be borrowed from other specialties. To confirm this need for training so that all citizens who turn to Emergency-Urgency Care to find adequately trained health personnel, in Italy, the Schools of Specialization in Emergency-Urgent Medicine have been activated since 2008; these Schools, however, can train 450 specialist physicians per year. The first specialists graduated in 2014. Against a workforce that sees about 15,000 physicians engaged in the Emergency-Urgent Care System, It is apparent that the Specialists coming out of the Schools of Specialization cannot guarantee a significant presence throughout the country. In addition, physicians already working in the Emergency-Urgent Care System, often with high competence and long professional experience, must be enabled to expand their preparation and acquire, after a structured training course, nationally valid certification as a preferential title for possible career advancement.</p> <p>At the end of the course, learners will have acquired the following knowledge and skills:</p> <p>Acquiring medical knowledge requires competent care for a wide range of patients in the ED.</p> <p>Describe the differential diagnosis and treatment of common symptoms in emergency clinical pictures.</p> <p>Describe the main clinical findings, treatment, and management of typical emergency clinical pictures.</p>
Access prerequisites	<p>A bachelor's or master's degree or single-cycle degree awarded according to the system under Ministerial Decree No. 270/2004 or Ministerial Decree No. 509/1999 or previous systems.</p> <ul style="list-style-type: none"> • LM-41 Medicine and Surgery <p>Degree awarded according to a system prior to Ministerial Decree No. 509/1999 in</p> <p>- Medicine and Surgery</p>
How the admission procedure takes place	Selection by academic qualifications
