Second Level	
Department of Experimental and Clinical Medicine (DMSC)	
Course coordinator	Francesco Cairo
Organizing committee	Francesco Cairo Veronica Giuntini Lorenzo Franchi Luigi Barbato Debora Franceschi
Contact person for information regarding course organization, the schedule of classes and course content	Prof. Francesco Cairo – francesco.cairo@unifi.it Dott. Luigi Barbato - luigi.barbato@unifi.it
Practical-professional profile of the course and reference job market	The second-level Master Course in Periodontology and Implantology is a three-year programme requiring full-time attendance and geared for Dentists eager to have specialized knowledge and training in the field of Periodontology, Reconstructive Therapy, and Implantology. Teaching activities include theory and practice working on patients. A period of active participation in research projects is planned. Training is completed with the presentation of surgically treated clinical cases. At the end of the three-year programme, students discuss a thesis. By the end of the course, students will have acquired theoretical and scientific knowledge pertaining to periodontal and implant therapy. They will also have acquired the specific skills and abilities to independently administer specialized treatments in periodontal and implant cases in patients.
Admission requirements	Single-cycle Master's degree awarded in accordance with the system under Ministerial Decree No. 270/2004 (or Master's degree under Ministerial Decree No. 509/1999, equivalent under I.D. of July 9, 2009) in one of the following classes: <ul style="list-style-type: none"> • LM-41 Medicine and Surgery; • LM-46 Dentistry and dental prosthetics; Degree awarded according to a system prior to Ministerial Decree No. 509/1999 in <ul style="list-style-type: none"> • Medicine and Surgery • Dentistry A license to practice in Italy and registration in the Board of Dentists is required.
Admission procedure	Selection based on qualifications combined with a selective test to verify knowledge on the anatomy of the periodontium and the stomatological apparatus, the etiopathology of periodontal diseases, principles of periodontal therapy, classifications of periodontal diseases, periodontal surgery, implant surgery and peri-implant reconstructive surgery. The test consists of an interview and a written exam.
Duration	27 months - three years
