

14. PERIODONTOLOGY AND IMPLANTOLOGYⁱ	
Level II	
Department of Experimental and Clinical Medicine (DMSC)	
Course coordinator	Veronica Giuntini ⁱ
Executive Committee	Veronica Giuntini Lorenzo Franchi Luigi Barbato Debora Franceschi
Contact person for information regarding teaching organization, class schedule, course content	Luigi Barbato luigi.barbato@unifi.it
Practical-professional profile of the course and industry sector of reference	<p>The second-level Master Course in Periodontology and Implantology is spread over three years, requires full-time attendance, and is intended for Dentists eager to have specialized knowledge and training in the field of Periodontology, Reconstructive Therapy, and Implantology. The modules include a theoretical and a practical part working on the patient. A phase of active participation in research projects is planned. The training is completed with the presentation of surgically treated clinical cases. At the end of the three years, a thesis is discussed.</p> <p>By the end of the course, learners will have acquired theoretical and scientific knowledge related to periodontal and implant therapy. They will also have acquired the specific skills and abilities to independently administer specialized treatments in periodontal and implant cases in patients.</p>
Access prerequisites	<p>Single-cycle degree obtained according to the system under Ministerial Decree No. 270/2004 (or specialist degree under Ministerial Decree No. 509/1999 equated under I.D. July 9, 2009) in one of the following classes:</p> <ul style="list-style-type: none"> • LM-41 Medicine and Surgery • LM-46 Dentistry and dental prosthetics <p>Degree awarded according to a system prior to Ministerial Decree No. 509/1999 in</p> <ul style="list-style-type: none"> • Medicine and surgery • Dentistry <p>A license to practice in Italy and registration in the Board of Dentists is required.</p>
How the admission procedure takes place	Selection based on qualifications combined with a selective test, aimed at verifying knowledge on the anatomy of the periodontium and the stomatological apparatus; etiopathology of periodontal diseases; principles of periodontal therapy; classifications of periodontal diseases; periodontal surgery; implant surgery and peri-implant reconstructive surgery. The test will consist of an interview and a written test
